MESSAGE FROM THE CEO

Electric Power System Engineering Company (EPS) is specialized in carrying out consulting and engineering services in the field of Electric Power Systems. EPS, a joint-stock Egyptian Company, established in October 1982 according to the laws of the General Authority for Investment and Free Zones.

Since its establishment, **EPS** is offering services in the fields of Electric Power Generation, Transmission Line, Distribution Systems, control & communication, Transformer Substations, Power System Planning and Information Technology and is ISO 9001 /2015 certified since February 1.2001 Until June 2026.

The services cover power system planning, techno-economic feasibility studies, power system detail design, and preparation of tender documents, bid evaluation, contracting support, and project management.

EPS has developed extensive packages of software applications oriented to automate managerial and financial processes, as well as, to support management decision-making.

Furthermore, **EPS** participated in international consultancy and contracting services for various Arab & African countries. During the last 30 years, **EPS** has succeeded to increase its scope of services extensively, and successfully, undertaken to cover a wide range of activities for more than **6300** projects. The company has also been engaged in several consulting and engineering services for generation, transmission, and distribution projects in Arab and African Countries. **EPS** is a recognized leader in power systems analysis and network expansion planning, sub-stations, transmission lines, distribution networks, and SCADA projects. One of the main focuses of the Company is to deliver quality and cost-effective services that satisfy the customers. To achieve customer satisfaction.

EPS is committed to provide quality and cost-effective engineering services in the field of electric power systems that fully meet the needs and expectations of every customer through expertise and standard of excellence. The company is also dedicated to use information technology to develop systems driven by customer need.

EPS vision is to be successful, well reputed, continues to serve a growing.

EPS also envisages expanding the services into business architecture and strategic Planning. Information technology is linked to business architectural and surveying issues to form an integral part of the business delivered to public sector, private sector and inter professional activities covering National and Regional markets.

Dr. Eng. Khaled El Destawy

INTRODUCTION

EPS is a joint stock Egyptian Company established in October 1982 under the laws of the General Authority for Investments and Free Zones. The company is specialized in carrying out engineering and construction management services in the field of Electric Power Systems.

Since its establishment, **EPS** has conducted services for more than **6300** engineering projects in the fields of electric power generation, transmission and distribution in Egypt and in Arab Countries.

The services cover power systems planning, techno-economic feasibility studies, power systems analysis, preparation of tender documents and contracting support, supervision at construction sites, operation & Maintenance, development and implementation of information technology applications. In addition, EPS carries out Training Courses.

From inception to completion, we prepare tender documents, plan, execute, and control projects backed by proactive planning and first-hand knowledge of contract terms, client objectives, responsibilities, and capabilities. Project budgets are continuously monitored to secure budget and contract compliance.

Engineers, technologists in addition to teams that are comprised of a variety of professions and disciplines are pooled to create effective project organization structures.

MISSION

EPS is committed to provide quality and cost-effective engineering Services in the Field of electric power systems that fully meet the needs and expectations of every customer through expertise and standard of excellence. The Company is also dedicated to use information technology to develop systems driven by Customer needs.

VISION

EPS vision is to be successful, well reputed, and continues to serve a growing market and can, with no limitations, compete international consultants.

EPS also envisages expanding the services into business architecture and strategic planning. information technology is linked to business Architectural and Surveying issues to form an integral part of the business delivered to public sector, private sector and inter professional activities covering national and regional markets.

“ Grow with profit”

OBJECTIVES

EPS objectives are:

- 1) To operate for continuity, profile and stability and establish growth objectives through effective management policies and planning procedures.
- 2) To provide shareholders with fair return on investment.
- 3) Employee performance to be stimulated information systems that serve the processes and the management.
- 4) Invest in corporate development and individual training.
- 5) Continually provide employees with modern efficient development and production tools to be forefront in all fields of firm's practice.
- 6) Opening new markets.
- 7) Achieve continuous customer satisfaction.
- 8) To maintain relations with employees through active participation, adequate communication, fair compensation and benefits, good working conditions opportunities for work satisfaction, advancement and professional development.

Organization

EPS is organized to offer a full range of consultancy and engineering services in the fields of power systems engineering. Each individual project is managed with only one goal in mind, which is to render the services required at the highest international standards.

Projects Group

For each specific project or task, a number of specialized engineers are integrated to form a project team, managed by a long-experienced team leader or project manager. Those specialists are assigned from the company's different departments to perform their respective tasks in accordance with established schedules and milestones to fulfill the project objectives.

To provide an even wider range of engineering capability, **EPS** draws directly from the highly qualified and experienced personnel working with the different authorities and organizations of the Electricity and Energy sector

Consultants

EPS has expanded its technical resources and engineering groups by employing consultants and specialists of the highest caliber as either inhouse or independent consultants to support the projects and project teams.

Facilities

The Company has computer facilities and software packages which provide considerable support during the implementation of different contracts.

EPS also maintains continuous liaison and special agreements with various specialized laboratories and research centers, in order to avail on their facilities and expertise whenever necessary.

Organization Structure

KEY PERSONNEL

EPS is managed by highly experienced group of managers. The key personnel are:

<i>Name</i>	<i>Position</i>
Dr. Eng. Khaled El Destawy	Chairman and Chief Executive Officer
Eng. Asmaa El-Desouky	Substations, Sector Head
Eng. Khalid Hussien	Distribution Networks, Sector Head
Eng. Mohamed Saad	Civil Works, Sector Head
Eng. Hasan Negem	Transmission Lines & Cables, Supervisor of Sector Head
Eng. Soha Zakaria Sharaf	Networks Studies, Sector Head
Eng. Nevien Khadr	Information & Applications Automation, Sector Head
Eng. Hatem El Ghorory	Business Development Department
Mr. Mohamed Mekhemer	Admin. & Human Resources, Sector
Acc. Khaled El Tager	Financial Affairs, Sector

Ownership

EPS shares are held and equally divided between the following Authorities and Companies:

- ⚡ Egyptian Electricity Holding Co.
- ⚡ Nuclear Power Projects Authority
- ⚡ Hydro Power Plants Authority
- ⚡ Cairo Electricity Distribution Co.
- ⚡ Alexandria Electricity Distribution Co.
- ⚡ El Nasr Transformers & Electrical Products CO.
- ⚡ High Dam Electric & Industrial Projects Company.
- ⚡ Misr Company for Mechanical and Electrical Projects.

The first six shareholders are owned by the Ministry of Electricity and Energy; the next shareholder is affiliated with the Ministry of Public Sector, while the last shareholder is a Privately-Owned Company.

Major Organizations Recognizing EPS

EPS Company is recognized as a Consulting Firm by the agencies given below:

- The World Bank
- The African Development Bank.
- The Arab Fund for Economic and Social Development.
- The Islamic Bank
- Kreditanstalt für Wiederaufbau (KfW)
- The United Nations Development Program
- The Commission of the European Communities
- European Investment Bank (EIB).

EPS is also a member of the Egyptian Syndicate of Engineers and the Federation of African Consultants

Contracts Share from 1/01/2024 till 31/12/2024

Activities and Services

Fields of Activities		Services
Distribution Networks	○ Distribution Networks Projects ○ Rural Electrification Networks ○ Urban Supply Networks	- Distribution Networks ○ Load Research and Load Forecasting ○ Field Measurements ○ M.V. and L.V. Networks Design ○ Short Term and Long Term Plans ○ Indoor & Outdoor Lighting ○ Optimization of Losses ○ Protection Coordination ○ Supervision for all Elements of Electrical Distribution Networks
Substations	○ Substations up to 500/220KV, 220/66KV, 66/22/11KV	- Substations ○ Engineering Services ○ Protection Coordination ○ Substation Control System ○ Switching Stations ○ Substation Interconnection ○ Communication System ○ Procurement Services ○ Project Management ○ Construction Supervision Services
Transmission Line & Cables	○ Transmission Lines up to 500Kv ○ Power Cables up to 500 KV	- Transmission Lines & Cables ○ Towers Electrical Design ○ Towers Spotting ○ Surveying Works ○ Soil Mechanics ○ Procurement Services ○ Construction Supervision

Activities and Services

Fields of Activities		Services
Civil Works	○ Design of Steel and Concrete Structures ○ Procurement Activities ○ Construction Supervision	- Civil Works ○ Design & design review of steel structures for overhead transmission towers up to 500KV. ○ Design & design review of telecommunication towers up to 120-meter height. ○ Design & design review of civil works for substation GIS and AIS types up to 500KV including detailed design and shop drawings for control and switchgear buildings, transformers foundation, outdoor equipment supports, trenches and roads. ○ Prepare BOQ and material list structure and architecture items ○ Design reports and provide solution for the upgrade of existing overhead transmission lines, include steel towers and foundations repair and stiffening
	○ Steam Plants ○ Gas Turbine Plants ○ Combined Cycle Plants ○ Diesel Plants ○ Hydro-Electric Plants ○ Wind Farms ○ Solar PV and CSP ○	- Power Station Projects ○ Studies and Project Investigations ○ Engineering Services ○ Procurement Services ○ Project Management ○ Construction Supervision ○ Operational and Maintenance Management

Activities and Services

Fields of Activities		Services
Networks Studies and SCADA Control Systems	1- Network Studies	1) Network and Technical Studies - Interconnection of new and existing substations/power stations studies - Feasibility studies - High, Extra high and medium voltage network planning studies - Load forecast & development of distribution network - Power quality study - Grid impact studies for renewable energy (wind and solar energy)
	2- Detailed Engineering design for substations	2) Detailed Engineering Design Services a) Primary Engineering. b) Secondary Engineering c) Electromechanical
	3- Control Systems	3) Control Systems a) Distribution Control Centers b) Regional Control Centers c) Telecommunication and Control Systems
	4- Overseas operations	4) Overseas Operations - Technical & Financial Offers - Conduct Contract Agreement - Prepare the Contracts documents - Coordination between company participated sectors - Assigning EPS Experts for Specific Jobs - Training
	5- Power Station Projects	5) Power Station Projects - Project Management - Engineering Services - Construction Supervision - Operational and Maintenance Management - Feasibility Studies - Green Hydrogen
Information & Applications	- Business Modeling - Professional Support Systems - Management Information Systems and	- Information & Applications Automation - Business System Architecture Modeling - S.W Engineering - Networking - Testing - Implementation

	Management Support Systems ○ Computer Networks (LAN, WAN) ○ Billing Systems ○ Geographic Information Systems ○ ERP ○ CRM ○ Hospital Applications	○ Web Design ○ High availability Solutions ○ Geographic Information Systems
--	---	---

DISTRIBUTION NETWORKS

Projects served till the end of 2024 = **5540** Projects

 dis-st@eps-egypt.com

Scope of work

- ⚡ Planning & Design supervision electrical networks for agricultural lands
- ⚡ Planning & Design of Distribution networks for new cities
- ⚡ Rehabilitation of distribution networks for rural areas
- ⚡ Power factor measurements and how to improve

Projects served

Distributed among the following activities

- ⚡ Planning and Design of M.V. for main Electrical Networks for East Owinat
- ⚡ Planning, Design & Supervision of erection for internal electrical networks covery for 22 plants (50,000 fed and 20,000 fed) at East Owinat, 54,000 fed.
- ⚡ Planning & Design of Distribution Networks for 27 New Cities
- ⚡ Design of Electrical Power Supply of 4150 Factories
- ⚡ Rehabilitation of Distribution Networks for 35 Rural Areas
- ⚡ Planning and Design of M.V. for main Electrical Networks for Toshka
- ⚡ Electrical Supply Networks for 3 High – Riser Buildings
- ⚡ Power Factor Improvement for 51 Plants
- ⚡ Preparation of opacification for led luminaires and approved & kinds of luminaire for all street lighting networks
- ⚡ Others 200 Projects

Planning & Design of M.V for
Electrical Networks for East Owinat

Consultancy Services for the Broadcast
Television Building (Maspero)

Major Projects

Interconnection Owainat East with the Electric National Grid

- ⚡ Electric Distribution Networks for 22x10000 Feddan including 2000 km of 22 kV and 300 km of 0.4 kV Low Voltage Networks

Completion Date 2021

Distribution Networks (Medium and Low Voltage)

- ⚡ For 50,000 fed and 20,000 fed for Owainat East, 54,000 fed.

Completion Date 2022

OverHead Transmission Lines 22kV

Go Through the Future

SUBSTATIONS

Projects served till the end of 2024 = 27 Projects

 sub-st@eps-egypt.com

Scope of work

- ⚡ Project study and design
- ⚡ Feasibility study
- ⚡ Bid Documents Preparation
- ⚡ Bids Evaluation
- ⚡ Prepare Technical Evaluation report with recommendation
- ⚡ Prepare Final evaluation report with recommendation
- ⚡ Prepare contract documents
- ⚡ Project Management
- ⚡ Detailed design review of the substation
- ⚡ Site Supervision of construction, testing & commissioning till handing over

Projects served

Distributed among the following voltage levels

500	kV S/St's	30
380	kV S/St's	5

OVERHEAD TRANSMISSION LINE & CABLES

Projects served till 30/04/2025 = **^62 Projects**

ohntl@eps-egypt.com

Scope of work

We design, manage and supervise the construction of transmission projects; we have successfully engineered many complex projects, providing the best solutions for transmission problems. Our scope includes but not limited to the following:

- ⚡ Survey and geotechnical investigations
- ⚡ Complete designs for Overhead Transmission lines using the most powerful software packages known in the business
- ⚡ On site supervision of Transmission and Distribution Projects
- ⚡ Design and supervision of Underground Cable installations for high and medium voltage projects
- ⚡ Preparation of tender/contract documents as well as tender evaluation, technically and financially
- ⚡ Studies for upgrading and rehabilitation the aged High Voltage and Medium Voltage networks
- ⚡ Planning, feasibility studies and selection for the best economical and technical solutions for new and existing Overhead Transmission Lines

Projects served **30281 km**

Distributed among the following voltage levels

500	kV T.L	9750	Km
400	kV T.L	1470	Km
380	kV T.L	950	Km
220	kV T.L	11420	Km

Major Projects

Zahraa Maadi Interconnection

⚡ 500 kV OHTL South Helwan/Zahraa El Maadi

Completion Date 2018

Single Circuit OHTL Abu Qeer/ Badr 500

⚡ Total Length 344 km

Completion Date 2015

Owinat New 220 kV

⚡ Double circuit Main Owinat , total length of 65 km

Completion Date 2/2021

Double Circuit OHTL Samalut / Suez Gulf 500 kV

⚡ Total Length 257 km

Completion Date 2017

Double Circuit OHTL Tebben / Kurimat 500 kV

⚡ Total Length 155 km

Completion Date 2019

Double circuit Owinat New/ Gabal El-kamel 66 kV

⚡ Total Length 30 km

Completion Date 2/2021

- Study Crossing of 66 kV, 220 kV OHTL with El-tammer road of obour (20 km).
- Study Crossing of 66 kV, 220 kV OHTL with New Delta Water Trasport Canal of obour (75 km).
- Study crossing of 66 kV & 220 kV OHTL with Monorail route.
- Study crossing of 66 kV & 220 kV OHTL with Electrified train route
- Design H.V. UG cable of Buffer Zone in the Administrative Capital for Urban Developments (ACUD).
- Design and Execution Supervision of OHTL & UG cables for the New Urban Developments (NUCA) at New Al-Alamine , New Mansoura, New Cairo, 6 October, El-sadat, Badr , 10th of ramadan and El-Obour.
- Survey & Design of Wadi Hadramout (Republic of Yemen) for 132 kV OHTL (30 km).
- Surveying works for 500 kV OHTLs to connect Solar PV, Wind Farm and Ain Sokhna (H₂ – Ammonia) ACWA Power / Egypt Project with the national Grid 500 kV.

CIVIL WORKS

Projects served till the end of 2024 = **528** Projects

 civil@eps-egypt.com

Scope of work

EPS civil sector provides consultancy services for the structure and architecture design, preparation of technical specifications and tender documents, projects management, construction supervision especially for substations up to 500 KV, power generation, OHTL towers up to 500 KV and telecommunication towers.

Services provided are given a competitive advantage as we apply the latest method of technology in the engineering by using the latest international computer systems and program, the scope of services include but not be limited to the following:

Engineering service

- ⚙ Detail design of architecture and structure for substations (66, 220, 500 kV).
- ⚙ Steel structure design of over Head transmission towers for 66, 220 and 500kV
- ⚙ Steel structure design for Gantries and Equipment supports.
- ⚙ Detail design of foundations for O.H.T towers.
- ⚙ Design of service roads for renewable energy projects of wind farms and solar energy plants.
- ⚙ Preparation of work shop drawings for all architecture and structure drawings.
- ⚙ Technical and structure studies for strengthening of existing O.H.T steel towers.
- ⚙ For Administrative building

Construction supervision

- ⚙ Supervision of foundation work for O.H.T.L.
- ⚙ Coordination between different contractors.
- ⚙ Material inspection and testing.
- ⚙ Follow up all construction activities with respect to project schedule.

Projects served **528 Projects**

Distributed among the following activities

Overhead Transmission Line Projects	375
Substations Projects	71
Telecommunication Towers Project	36
Distribution Panels & Services Buildings Projects	38
Consultancy Services for Industrial Projects	7
Administrative building	1

Design & Construction Supervision
Of MicroWave Towers

Loading test for Towers

Deep Foundations (Piles) for OHTL

Foundation for OHTL

High Voltage testing station
Repair of Steel Structure
& Foundation

Offshore Towers

Control Center

Adjustments of embedded parts
by template

Soil replacement and compaction

Plate Load Test on Soil Replacement

An aerial photograph of a wind farm situated in a vast, arid desert landscape. Several large, white, three-bladed wind turbines are visible, stretching from the foreground into the distance. The ground is sandy and uneven, with some small structures and access roads near the bases of the turbines. In the far background, a blue body of water, likely the ocean, meets a clear blue sky. A yellow rectangular banner is overlaid on the middle of the image, containing the text "Go Through the Future".

Go Through the Future

POWER STATIONS PROJECTS

Projects served till the end of 2024 = **84** Projects

 powgen@eps-egypt.com

Scope of work

Power stations services cover

- ⚡ Feasibility Studies & Project Investigations
- ⚡ Engineering Services
- ⚡ Procurement Services
- ⚡ Project Management & Construction Supervision
- ⚡ Operation & Maintenance Services
- ⚡ Maintenance Management systems

Total Generation Capacity Served

Distributed among the following types of Power Stations

- ⚡ **Steam Power station**
- ⚡ **Gas Turbine Power station**
- ⚡ **Diesel Power station**
- ⚡ **Combined Cycle Power station**
- ⚡ **Feasibility Studies**
- ⚡ **Co-Generation Power station**
- ⚡ **Hydraulic Power station**
- ⚡ **Wind Farms**
- ⚡ **Solar PV & CSP**

1- Steam Power stations:

1• Projects with a total power reached **7535 MW**

2- Gas turbine and Combined Cycle power stations:

7 Gas turbine projects 7 combined cycle projects with a total power reached **5775 MW**

3- Diesel Power Stations:

12 Projects with a total power reached **84.9 MW**

4- Co-Generation Power stations:

Two Projects with a total power of **26.3 MW**

5- Hydraulic Power stations:

5 Projects with a total power reached **169.3 MW**

6- Wind Farms:

12 Projects with a total power of 2265 MW distributed as follow: -

- ⚡ NREA/DANIDA Zafarana Wind Farm Phase I (30 MW)
⚡ The project comprises 50 units of 600 kW. The units are running now.
- ⚡ NREA/DANIDA Zafarana Wind Farm Phase II (30 MW)
⚡ The project includes 46 units of 660 kW. The farm is running now.
- ⚡ NREA/KFW Zafarana Wind Farm Phase I (33 MW)
⚡ The farm is consisting of 55 wind energy converters of 600 kW.
⚡ The units are running now.
- ⚡ NREA/KFW Zafarana Wind Farm Phase II (47 MW) The project comprises 71 units of 660 kW the units are now running.
- ⚡ Spanish 85 MW wind farm. EPS acted as main consultant for all local works. The project comprises 100 turbines of 850 kW each.
- ⚡ Kfw IV Zafarana 80 MW wind farm. EPS acted as sub-consultant with LI as main consultant. The project comprises 94 turbines of 850 kW capacities each.
- ⚡ JBIC Wind Power Plant Project at Zafarana (120 MW) – NREA sub-consultant with Decon. The project comprises 142 turbines of 850 kW capacities each.
- ⚡ JICA 220 MW Wind Farm Power Plant at Gabal El-Zeit as Subconsultant to Lahmayer in the field of MV and LV network and carry out the feasibility study.
- ⚡ 545 MW Consultancy services agreement with NREA for operation and maintenance of the wind farms at Zafarana in order to improve the availability and productivity of the plant.
- ⚡ 250 MW Wind Farm at Gulf Suez, Ras Ghareb – NREA- sub consultant with Tractebel.
- ⚡ 250 MW West Bakr Wind Farm (WBWF) End of Warranty (EOW) Process with Lekela Power.
- ⚡ Initial stage of 700 MW, Private Wind farm at East of Nile with Orascom construction.

7- Solar Energy:

EPS had signed joint venture agreements with the following entities: -

- ⚡ British University Egypt (BUE).
- ⚡ Solar Technology Advisor (STA).
- ⚡ Engcotec Advanced Technology – Prof Dr. Ibrahim Samak.
- ⚡ New and Renewable Energy Authority (NREA).
- ⚡ NOKRASHY Engineering GmbH Prof. Dr. Hany El Nokrashy.

In the field of Solar Power Stations Project.

- ⚡ Provide consultancy services for operation and maintenance of Kureimat thermal solar power plant 140 MW for NREA.
- ⚡ EPS were sub-consultant for the Engineering Services for Kureimat Solar Power Station (140 MW) with the German Consultant Fitshner.
- ⚡ Carryout Maintenance and operation of Solar PV Plant for Ministry of Environmental at Cairo House and Suez Branch 70HW

- ⦿ EPS completed the project of installing **10** KW PV solar over its Building at Sheraton Heliopolis.
- ⦿ EPS has been assigned to be the independent engineer for the feed in Tariff (FiT) PV power projects at Benban with a capacity of **1465** MW.
- ⦿ EPS is the main consultant to carryout the consultancy services including the detailed design for **3** plots with total power of **165** MWp PV, FiT power plants at Benban.
- ⦿ EPS was selected by Egyptian Transmission Company as a short list with STA for offering consultancy services for **200** MW at Kom Ombo.
- ⦿ EPS provided support to Egyptian Electricity Transmission Company (EETC) for technical analysis and evaluation of the contractor's proposals in the field of wind farm and PV solar projects at Egypt with a capacity reaches **4300** MW BOO Projects.
- ⦿ Initial stage of 900 MW, Private Solar PV Power Plant at Wahat with Infinity power & Hassan Allam B.V.
- ⦿ Initial stage of 900 MW, Private Solar PV Power Plant at East of Nile with Orascom construction.
- ⦿ Prepare preliminary study for Solar PV market in Egypt with ELMACO.
- ⦿ Supervision & monitoring during construction and O&M of the facility management contractor for solar PV power plants in Benban, Aswan.
- ⦿ EPS/Engcotec achieved the following activities in the first stage of New Toughka City (5000 KWp solar PV) project:
 - ⚡ Performing the feasibility study.
 - ⚡ Prepare the study of interconnection the solar park with the unified grid.
 - ⚡ Preparing the tender documents for the project
 - ⚡ Assist the Owner (NUCA) in the evaluation of the contractor offer.

8- Feasibility studies:

- ⦿ EPS prepared a study to develop the performance evaluation for electric production companies in the Arab Republic of Egypt and determine the target values for the operation key performance indicators according to international standards for the benefit of the Electricity utility and consumer protection Regulatory Agency.
- ⦿ EPS performed pre-feasibility studies for PV solar system at Canal Electric Distribution Company.
- ⦿ **5** MW Co-generation project KC textile factor at 10th, of Ramadan City.

9- Green Hydrogen Projects:

EPS carried out the following scope of services including the following studies:

- ⚡ Description of the Egyptian power system and possibility of connecting the sites for both of generation and demand with EETC network.
- ⚡ General requirements for PCC including typical split between developer and TSO (EETC) and the relevant grid codes to adhere in Egypt.
- ⚡ Technical requirements by EETC concerning the design of substations and transmission lines.
- ⚡ Regulatory requirements such as connection fees, transmission fees...etc.
- ⚡ Generic CAPEX for HV Substations, OHTLs and UG Cables in Egypt.
- ⚡ The process of procurement, sourcing and generic construction of substations, overhead transmission lines and underground cable in Egypt taking into consideration the local and approved suppliers / contractors from EETC.

Green Hydrogen Energy Projects.

EPS provided Consultancy Services for the following projects:

- ⚡ Decarbonizing Shipping – E-fuels production project in Egypt by MAERSK with COWI.
- ⚡ Green ammonia production project in Egypt with Globelec.

OVERSEAS OPERATIONS

Projects served till the end of 2024 = **26** Projects

 overseas@eps-egypt.com

Scope of work

- ⚡ Conduct Pre-feasibility Study & Feasibility Study.
- ⚡ Study and prepare technical and financial tender documents according to client TOR.
- ⚡ Design of reinforced concrete structures and reinforced concrete deep and shallow foundations for Substations, Power Generation & OHTL's.
- ⚡ Prepare contract documents between the client and EPS.
- ⚡ Prepare contract documents between the client and successful bidders.
- ⚡ Project management and construction supervision
- ⚡ Coordination between company participated sectors
- ⚡ Conduct contract / progress meetings
- ⚡ Assign EPS experts to participate for providing engineering services for specific jobs.
- ⚡ Provide required assistance to the client during guarantee period
- ⚡ Setting KPI (key Performance Indicator) to measure the implementation of contracted work.
- ⚡ Technical consultant for supervision & monitoring for facility management contractor (FMC).
- ⚡ Independent Engineer, Report to stakeholders the status, progress & achievement of milestone.
- ⚡ Independent Engineer To attend Operating Committee meetings

Overseas Projects

- ⚡ Providing Consultancy Services to Oman Electricity Transmission Company (OETC) in Sultanate of Oman, Qatar General Electricity and Water Corporation (KAHRAMAA) in Qatar, Saudi Electricity Company (SEC) in Kingdom of Saudi Arabian, Dubai Electricity Water Authority (DEWA) in United Arab of Emirates, Republic of South Sudan Government, Burundi Government, General Electrical Company Of Libya (GECOL) in Libya and Algerian Energy Company (AEC) in Algerian for Substations, Transmission Lines, Civil Works, Distribution Networks and Power Systems Studies Projects.
- ⚡ **Independent Engineer for infrastructure (substations, OHTL, underground cables, Local monitoring center, roads around the site (ring road) & internal roads.**
- ⚡ Reporting to Stakeholders on the state of completeness of the relevant Infrastructure Works.
- ⚡ Determining whether the infrastructure works milestones have been achieved.
- ⚡ **Independent Engineer To attend Operating Committee meetings.**

- ⚡ Review and agree the matters relating to the construction, commissioning, operation and maintenance of the Project.
- ⚡ **Technical consultant for supervision & monitoring of facility management.**
- ⚡ Coordinating with the FM contractor to set time schedule for Monitoring and Supervision.
- ⚡ Setting KPIs to measure the implementation of contracted works for each activity.
- ⚡ Supervision of implementation of Contractor works.

Major Projects

Independent Engineer for PV Power Project at Benban

Running

Technical Consultant (TC) for Supervision & Monitoring of Facility Management Contractor During Construction and O&M phase

Completion Date 2019

Independent Engineer for RA SOLAR S.A.E.

Completion Date 2018

Independent Engineer for Lekela Egypt Wind Power BOO S.A.E-

Running

Technical Consultant (TC) for Lekela Egypt Wind Power BOO S.A.E

Running

South Sudan

- ⚡ Electric Distribution Network of Wau City 15 MW 11 kV

Completion Date 2012

- ⚡ New Wau Hydropower on Sue River Dam with capacity 10.4 MW

Completion Date 2014

Substation & Transmission Line Oman

Power Generation & Distribution Sudan

Burundi

Pre-feasibility study for kirasa hydropower project in republic of Burundi

NETWORKS STUDIES & CONTROL SYSTEMS

Projects served till the end of 2024= **372** Projects

 syseng@eps-egypt.com

Scope of work

The Networks studies and control system sector including:

- ⚡ Network and Technical Studies
- ⚡ Detailed Engineering Design Services
- ⚡ SCADA, Telecommunication and Control Systems

1. Network Studies

⚡ Electrical Network Planning Studies

- A. Load forecast studies.
- B. Planning of high voltage, extra high voltage and medium voltage networks including.

Static studies:

- ⚡ Load Flow Calculations Study.
- ⚡ Three Phase and Single-Phase Short Circuit Calculations Study.
- ⚡ Contingency analysis.

Dynamic studies:

- ⚡ Dynamic studies have been performed to assess the system stability and to establish the stability limits following a set of critical faults on the power system. These studies assess the dynamic performance of transmission system modelling.

- C. Rehabilitation and expansion of electrical power High voltage networks.
- D. Planning of medium voltage networks including load forecast.

⚡ Interconnection studies

Interconnection of new and existing substations/power stations with studies for the power system high voltage (unified network).

⚡ Interconnection Studies for Renewable Energy Plants

Study the impact of the connection of wind farm generations as well as the solar plant (Static and Dynamic studies)

- E. Marketing and Feasibility Study

Projects:

- ⚡ A Market study for Power and Distribution Transformer in Egypt.
- ⚡ Gird Impact Study for Al-Subh Solar Project Plants for Three different plots with a lot of power 120 MW. (including static and dynamic studies) according to the Egyptian Gird Code.
- ⚡ 250 MW BOO Wind Power Plant Project at Ras Ghareb as a Consultant for the main contractor (Orascom Construction).
- ⚡ Study the influence of the interconnection of Masder (200 MW) Wind Farm to the Unified Power.
- ⚡ Study the influence of the interconnection of Italgen Wind Farm to the Unified Power System by the year 2013.
- ⚡ 650 MW BOO Wind Powe Plant Project at Ras Ghareb as consultant for main contractor (Orascom constructor)

2. Detailed Engineering Design Services

The detailed Electrical Engineering includes the following activities:

A. Primary Engineering.**B. Secondary Engineering****C. Electromechanical****Projects:**

- ⚡ Benban (3) 500 kV GIS Substation (500/220/22) kV.
- ⚡ 15th of May (220/66/11) kV GIS Substation
- ⚡ El Narges (220/66/22) kV GIS Substation
- ⚡ 250 MW BOO Wind Power Plant Project at Ras Ghareb as a Consultant for the main contractor (Orascom Construction).
- ⚡ Tameya (220/66/11) kV GIS Substation.
- ⚡ Sharm (220/66/11) kV GIS Substation.
- ⚡ Hurghada (220/66/11) kV GIS Substation.
- ⚡ BenBan (1,2 &4) substations (220/22) kV.
- ⚡ 165 MW FIT projects PV at BenBan.
- ⚡ 500 MW BOO Wind Powe Plant Project at Ras Ghareb as consultant for main contractor (Orascom constructor)
- ⚡ 500 kV Interconnection between Saudi Arabia and Egypt Badr Converter station Taba2 transition Station.

Running Projects

- ⚡ North Delta Substation – ND4 (66/22 kV GIS S/S
- ⚡ North Delta Substation – ND5 (220/66/22 kV GIS S/S
- ⚡ North Delta Substation – ND9 (66/22 kV GIS S/S
- ⚡ Mallawy (66/11 kV GIS S/S

Dynamic Stability Simulation**for Load Shedding Study**

3. Telecommunication and Control Systems

EPS participate in the following control centers as a consultant

A. Distribution Control Center

- ⚡ North Cairo distribution control center
- ⚡ Alexandria distribution control centers (East – West – Middle)
- ⚡ Canal distribution control centers (Ismailia – 10th of Ramadan)
- ⚡ North Delta distribution control center (El-Mansoura)
- ⚡ South Delta distribution control center (Tanta)
- ⚡ Middle Egypt (Menya – Asyut)
- ⚡ Electricity distribution systems improvement projects:
 - ⚡ North Cairo: Helmiya
 - ⚡ North Delta: Damietta
 - ⚡ Alexandria: Borg Alarab

B. Regional Control Centers

- ⚡ Canal Regional Control Centers (CANRCC)
- ⚡ Upgrading Upper Egypt Regional Control Center for Nga Hamady.
- ⚡ Upper Egypt Regional Control Center for Samalout.

Software packages:

⚡ Networks and Technical Studies:

- ⚡ PSS/E Ver.34.5 (Power System Simulator for Engineers)
- ⚡ ETAP Ver. 10.0.0 (Electrical Transient Analyzer Program)

⚡ In Detailed Engineering Design Services

- ⚡ HAP Ver. 4.9 Hourly analysis program
- ⚡ AutoCAD
- ⚡ Revit
- ⚡ Dialux 4.12
- ⚡ Cymgrd
- ⚡ Cymca

Quality of Supply Study

Measurement of Harmonics

& Design of Filter

Information Technology

Projects served till the end of 2024 = **689** Projects

 itech@eps-egypt.com

The Role

- ⚡ Initiate the project through a development cycle, from initial planning to production based on customer needs.
- ⚡ Developing of Software Integrated Packages (Technical – Financial – Administrative)
- ⚡ Design and Implementation of Integrated Solutions
- ⚡ Supplying of hardware (Servers – PCs – Printers)

Development Methodologies

- ⚡ Software Engineering Development Process
- ⚡ Business Modeling
- ⚡ ERD Diagrams for Database
- ⚡ Object Oriented Design
- ⚡ Object Oriented Analysis
- ⚡ Object Oriented Programming

We are providing a Qualified Technical Support Team for Applications and Databases.

Using The latest technologies of Computers, Servers, as well as the latest release of Databases such as Relational DB SYBASE, MS SQL Server, ORACLE, others

Our Mission

- ⚡ Development Software Applications
 - ⚡ Desktop Applications
 - ⚡ Web Applications
 - ⚡ Mobile Applications
- ⚡ Maintained and support Applications
- ⚡ Network solutions
- ⚡ Hardware solutions and implementations

A unified program across Egypt

Unified Electric Meters Readings System

Electric Meters Readings System Is a Uniquely Designed Systems Which aims to record the Electric Meters Readings with high accuracy to reach a valid Electricity bill, nationwide.

The unified Meters reading system aims to eliminate the usual billing errors, record the readings as well, and avoid human errors using the latest technology and sophisticated System Design which enforces the meter reader to take a photo of the meter attached with the meter reader location and immediately send this data to the distribution companies to be validated and approved before issuing the Electricity Bills.

The subscribers' unified readings App record the meter reading and send it instantaneously to its distribution company through the app that photograph the meter and record the reading easily by entering the subscriber's reference and the meter number registered in the electricity bill.

Currently it is available on Google Play and is being added on the Apple App Store

All of this is done through a mobile application installed on mobile phones that run on Android system, which work according to the standards of digital connectivity, to allow the Meter Readers company "Shoaa" to record the Meters readings monthly

The System is currently Implemented Nationwide for the electricity customers at 9 distribution companies and serves over 23 Million Customer

Automation of subscribers' services

The project aims to integrate the daily operations carried out by each of the commercial and technical departments concerned with serving the subscribers

through a computer-based system to automate those processes, as well as issuing monthly invoices in a way that achieves the speed and accuracy of obtaining information and contributing to the decision-making and serving this project includes all subscribers applying to perform services.

ERP Systems

It is an integrated system that includes financial and administrative programs that cannot be dispensed with in all fields because it is compatible with the work system and regulations for each party, whether governmental bodies, private companies or business sectors

It works to serve the individual and the company and provides current and future solutions and speed of implementation so that the information is entered once and traded with all programs to complete the inputs, expenditures, revenues, and archiving of documents.

The activities as follows

1. Preparation of offers and contracting process and project management
2. Requirements Definition
3. Design
4. Development
5. Integration and Testing
6. Installation in customer site

EPS TRAINING CENTER

Projects served till the end of 2024 = **23** Projects

Services

- ⚡ Class-Room Training
- ⚡ On Job Training
- ⚡ Laboratory Testing
- ⚡ Field Training
- ⚡ Software Applications

EPS is providing different training programs. One goal of the training activity is to provide trainees with the specific knowledge and skills necessary to effectively perform their work. The training plan may also include, strategies for marketing. **EPS** training programs covering the fields of Power Stations Projects, Transmission, Distribution, Control Communication, and Information Technology.

Training courses are tailored to meet the needs of individuals, teams and organizations and are customized for developing their skills and improving their innovations and creativity.

EPS has an equipped training facility for formal class-room, and theoretical training. The training programs are structured as a mix of theory, practical experience knowledge, and laboratory experiments.

EPS is using the laboratory facilities available at the Training Centers in Egypt.

The following training programs were provided at **EPS**'s Training Centre:

- High Voltage Substation General Diploma.
- Primary substation Design.
- Substation protection, Testing& commissioning Secondary design.
- Substation protection, Testing& commissioning Secondary design (advanced).
- Power System Studies.
- Project Management.
- Distribution Course Level 1.
- Distribution Course Level 2.
- Substation Automation System (SAS).
- Planning of High Voltage Networks.
- Planning of Distribution Networks.

- Protection Coordination for Electrical Systems.
- Maintenance and Operation of Distribution Networks.
- Improvement of the Performance and efficiency of Power Stations .(Steam, Gas Turbine, Combined, Cycle, Hydraulic, and Diesel Stations).
- Operation and Maintenance of all types of Power Stations.
- Shaft Alignment, Balancing and Vibration monitoring of different types and Power Stations Rotors.
- Operation of Control Centers.
- Geographic Information Systems.
- Modern Transmission Lines Survey using Total Stations.
- Optimum Tower Spotting for High Voltage Transmission Lines using Computers.
- Short Term Unit Commitment for Power Stations.
- Large Scale Project Management.
- Legal Rules and Regulations for Electricity Companies.
- Distribution Networks Design & Planning.
- Safety in substations and switchyards.
- Dielectric oil testing and how to determine the transfer technical state form oil testing results.
- Dielectric gas SF6 testing technical state assignment
- Design and optimization of OHL using PLS-CADD and PLS. Tower SW.
- Electrical network study and planning and network losses reduction.
- Occupation safety and health administration.
- Quality management system documentation control.
- Numerical bay control unit.
- Wireless techniques.
- New generation in telecommunication systems.
- Interfaces between different telecontrol protocols .
- Computerized maintenance.
- Feeder protection, remote terminal units and SCADA systems.
- System grounding design and planning.
- Power feeding for the isolated area far away from the general electrical network.
- Information evaluation.
- Civil survey.
- Using the international standards.
- Power quality improvement for different loads.
- Planning and design methods for distribution for low voltage distribution networks.
- Study of protection against electrical shocks.
- Power Quality and energy saving.
- Electrical network performance implements and new power management .

1- EPS Stuff training

The Training for EPS stuff includes:

- Governance (Reasonable management)
- Anti-corruption compliance
- Strategi Plans

2- External Trainees

About 150 Trainees from the General Electricity Company of Libya, 50 from Public Electricity Corporation of Yemen, 45 from Southern Sudan Electricity Corporation (SSEC), 10 from Sultanate of Oman and 515 from Egyptian Electricity and Energy Sectors.

In addition to the above programs EPS has conducted training in Software applications to the employees of the different customers. Training covered how to run and maintain the application software in addition to databases such as: ORACLE, SYBASE, ACCESS, etc. Also, operating systems such as: Windows NT, Windows 2000, UNIX and open VMS are covered.

- The Number of Trainees till the end of 2019/20, reached more than **2050** Trainee.

The Training programs are to be organized at different locations as follows:

- EPS's Training Center at Cairo.
- Hotels.
- Customer's premises.
- Ministry of Electricity & Renewable (MERE) and EDCS's laboratories training Centers and site visits to the power utilities.
